

# ZOPHIA WIND FARM

We invite you to be a part of the  
Zophia wind farm project

Now we want to tell you  
more about the Zophia wind  
farm project and why you  
can look forward to what's  
happening in your  
community.

 ENVIRONMENTAL  
AND SOCIAL  
COMMITMENTS 

## A GREAT OPPORTUNITY

First of all, we are securing stable electricity for you, for generations to come. 343,000 households are looking at a new way of receiving electricity in a sustainable manner through 160+ turbines. Clean. Safe. No pollution.

### **Doing it the right way.**

We want to make sure you are informed and listened to. That's why we are establishing a social responsibility programme benefitting the local communities. But we also want to use the expertise and skills found locally, and we will coordinate practicalities in an ethical, compliant and transparent manner.

### **Taking care of nature**

For over a year we have had experts and science professional in the fields studying birds, animal tracks, flora & fauna in order to understand the seasons, the diversity and the potential impact & mitigations in the project. The more we know, the better we can plan. That is why we are establishing a conservation program to ensure biodiversity.

## WHO WE ARE

We are a Norwegian company, NBT, and we have developed wind farms for almost 20 years in close cooperation with local and international partners.

We take our responsibility as a developer very serious and are working according to international standards and local legislations. On the Zophia project we work with CET as the main contractor (China Electric Power Equipment and Technology Co. Ltd). We work as a team with common understanding of the traffic situation, the importance of job possibilities and the development of local suppliers and businesses.

## WHAT MORE DO YOU WANT TO KNOW?

- You will all be invited to regular meetings where we will inform you about the progress of the project.
- We have developed a scheme where you can submit your worries or your complaints. They will all be answered.
- We have created a form where you can apply for support for initiatives that will benefit your area or will contribute to a better life for many.
- We will support business initiatives that will create jobs or lead to competence.
- All the initiatives, official plans and forms can be found on our web-page, and we will tell you all about it when we have meetings. [zophiawindfarm.com](http://zophiawindfarm.com)
- We have a dedicated person that can help to answer questions.

It is highly important for us to work in a transparent manner and to listen to your concerns. We understand perfectly that development is leading to changes, and it is our job to make sure these changes are positive - and help us gain a better future, for both people and nature.

## FACTS ABOUT THE PROJECT

No of turbines  
in order of

**160+**

Number of households  
to receive green  
electricity.

**343 000**

Capacity of the  
project in order of

**790+ MW**

Capacity of each  
turbine

**4.5+ MW**

Transmission lines

**93km**
